CSU Extension is offering a second annual summer teacher training series on our newly enhanced Clean Energy Curriculum for Colorado Middle and High Schools. Science, technology, engineering, math, and social science teachers as well as informal environmental educators can all benefit from this training!

The second edition of the curriculum is tied to Colorado Academic Standards for science, math, social studies, and advanced placement. It has been tested in the classroom by over a dozen teachers and almost 1,000 students.

Participants receive:
- **Background information on Colorado clean energy**
- **Hands-on experience teaching selected lesson plans on energy efficiency, solar, wind, and geothermal energy**
- **Course completion certificates for license renewal credits**
- **Access to additional materials and support**
- **Lunch, the curriculum, and a mini-kit**

*All trainings held from 10:00am—3:00pm

Teachers had a lot to say about last year’s training:

“Your team literally saved me 25 hours of planning and searching for the best of the best!!”

“A great, simple overview of lessons included and how to find resources to use them and keep using them. Many trainings give you "stuff" that you later forget.”

Pre-registration is required - space is limited. Cost is $10 payable at the door.

Contact Sharal Foss at (970) 491-6281 or sharal.foss@colostate.edu to register.
