Strolling along paths of elegant beauty and many-themed planting areas begs the question “how can I do this in my yard?” When it’s time to spruce up your yard with annual flowers you head to the local garden center. Green industry professionals and university researchers develop recommendations for soil, water and nutritional requirements in Colorado. This assures everyone has access to regionally appropriate gardening information.

Whether it’s someone admiring the beauty of the landscapes in public areas or deciding what to plant at the local garden center, PlantTalk Colorado delivers answers to planting challenges based on university and commercial research.

Colorado State University Extension delivers research-based information and education to address gardening and commercial horticulture concerns, along with numerous other related topic areas, to the citizens of Colorado. It provides the “front door” to the University for the citizens in 59 urban and rural counties on the job, at home and in their communities. Extension provides information to the public through state specialists, horticulture agents, program assistants, media and information specialists and master gardener volunteers.

Denver Botanic Gardens, an urban oasis comprised of 23 dynamic acres in the heart of the city, is considered to be one of the top botanic gardens in the American West. Green inside and out, the Gardens offer unforgettable opportunities to flourish with unique garden experiences and diverse learning opportunities for the whole family. The living collections offer insights into growing plants and garden design, the Helen Fowler Library is stocked with more than 30,000 titles and the Gardens’ classes range from beginning lessons to professional seminars.

Green Industries of Colorado (GreenCO) is an alliance of eight trade associations representing diverse aspects of the plant and landscape industry. Industries include nurseries, greenhouses, sod growers, plant care professionals, retail garden centers, golf course management, arborists, landscape architects and landscape professionals. GreenCO members are committed to water conservation and industry-wide best management practices as a way of doing business.
