V(A). Planned Program (Summary)

Program # 7

1. Name of the Planned Program
Community Resource Development

2. Brief summary about Planned Program
Research and outreach will be targeted to municipal, county, state, and federal agencies, nongovernmental organizations, and citizens to provide information and analysis promoting community development. This will include community impact analysis of economic activity, community organization for progress, evaluation of the drivers of local development, and workforce professional and personal development.

3. Program existence :
   - New (One year or less)
   - Intermediate (One to five years)
   - Mature (More than five years)

4. Program duration :
   - Short-Term (One year or less)
   - Medium-Term (One to five years)
   - Long-Term (More than five years)

5. Expending formula funds or state-matching funds :
   - Yes
   - No

6. Expending other than formula funds or state-matching funds :
   - Yes
   - No

V(C). Planned Program (Situation and Scope)

1. Situation and priorities

Communities struggle to develop and maintain resources (human, financial, physical, social, environmental, and political). They are also challenged in providing the needed organizational capacity to assess, plan, and implement activities to address resource development and management. A lack of critical mass in smaller rural areas exacerbates issues found in all areas of the state. More specifically, rural areas of the US and Colorado face challenges due to marked differences in economic, educational, health and social opportunities relative to more urban areas. Colorado has some unique needs due to more sparse populations, a high natural amenity base (and share of public lands), a more transitory population and relatively low public service provision. People in rural areas tend to be older, poorer, more likely to be uninsured, and less educated than their urban counterparts. Communities require knowledge to evaluate their resource base, their economic and social service alternatives, and their futures.

2. Scope of the Program

☑ In-State Extension
☑ In-State Research
☑ Multistate Research
☑ Multistate Extension
☑ Integrated Research and Extension
☑ Multistate Integrated Research and Extension

V(D). Planned Program (Assumptions and Goals)

1. Assumptions made for the Program
• The competencies of CRD have been around for a long time and are still appropriate.
• Program planning is not always a one-time process. What is developed will need constant monitoring and adjustment.
• CSU and Extension are experiencing financial and political stress that requires us to engage new and expanding audiences.
• Extension has the organizational capacity to facilitate team building, situation assessment, and prioritize applied research needs in communities of Colorado.

2. Ultimate goal(s) of this Program

Community Resource Development Programs and expertise will provide tools so that citizens can make informed decisions to increase tax revenues, maintain and/or increase employment, and maintain and/or grow valued community resources.

Colorado State University is in a strong position to assist with the economic development of Colorado's agricultural and rural communities, as well as evolving industries related to these communities. Our role will be to educate professionals within communities with knowledge of community development and modern business practices, as well as researching technical and economic issues related to differentiated agricultural products in the ever-changing domestic and international marketplace. By being actively involved with agricultural industry personnel, rural communities, and governmental agencies, Extension and Research can assure that land managers, individual business owners, and community residents can evaluate a broad range of opportunities to enhance viability.

V(E). Planned Program (Inputs)

1. Estimated Number of professional FTE/SYs to be budgeted for this Program

V(F). Planned Program (Activity)

1. Activity for the Program

• Training for Extension personnel in community mobilization, facilitation, economic development.
• Working with rural communities on a regional approach to small town tourism including making optimal use of environmental resources, respecting the socio-cultural authenticity of host communities while conserving their built and living cultural heritage and traditional values, and ensuring viable, long-term economic operations, including stable employment and income-earning opportunities.
• Conducting basic and applied research in areas exploring the interface between agribusiness, rural development, and natural-resource-amenity-based opportunities.
Conducting workshops and other educational activities with Extension professionals and community stakeholders.

### 2. Type(s) of methods to be used to reach direct and indirect contacts

<table>

V(J). Planned Program (External Factors)

1. External Factors which may affect Outcomes

- Natural Disasters (drought, weather extremes, etc.)
- Economy
- Appropriations changes
- Public Policy changes
- Government Regulations
- Competing Public priorities
- Competing Programmatic Challenges
- Populations changes (immigration, new cultural groupings, etc.)
- Other

Description

Community Resource Development, and its partner, Economic Development, are highlighted by the Office of the Vice President for Engagement. With efforts to focus CSU Extension programming, we may consider CRD as a process rather than an issue. The goal is to intentionally integrate CRD into all issues work. A proposed model includes:

- Built capital (human-made material = buildings, equipment, information, infrastructure)
- Human and Social capital (people = skills, health, abilities, education; and connections = family, neighbors, community, and government)
- Natural capital (natural resources &ndash food, water, metals, wood, and energy; ecosystem services = fisheries, fertile soil, water filtration, and CO2-Oxygen; beauty of nature = mountains, seashores, sunlight, rainbows, and bird songs)

V(K). Planned Program (Evaluation Studies and Data Collection)

1. Evaluation Studies Planned

- After Only (post program)
- Retrospective (post program)
- Before-After (before and after program)
- During (during program)
- Time series (multiple points before and after program)
- Case Study
- Comparisons between program participants (individuals, group, organizations) and non-participants
- Comparisons between different groups of individuals or program participants experiencing different levels of program intensity.
- Comparison between locales where the program operates and sites without program intervention
- Other

Description
Regular pre-post evaluations are used. Formative evaluations are often used during the program to adjust focus and direction. Case studies are used to clearly demonstrate impact.

2. Data Collection Methods

- Sampling
- Whole population

**Survey (Mail, Telephone, On-Site).**

- Mail
- Telephone
- On-Site

**Interview**

- Structured
- Unstructured

- Case Study
- Observation
- Portfolio Reviews
- Tests
- Journals
- Other

**Description**

Pre-post tests. Standard survey methods. Some evaluation conducted through class projects in various CSU departments.
